

## SCIENTIFIC THOUGHT

Our students are being raised in an environment where science is looked at as god. Everywhere they turn they see that science can do anything and it has replaced the God of the Bible.

The class of Scientific Thought will show students what science really is. A tool, our God has given to His children, to use to be good stewards of the Earth He made.

The class begins by telling what Evolution and Creation both really are and what we should see if either is true. Although this is not a Bible class, time will be spent in the scriptures searching for what God has to say on the matter. I Peter 3:15 tells us that we should always be ready to tell why we believe what we believe.

From there we will learn about how the Laws of Thermodynamics support the Creationist point of view. We will also review the information evolutionists have about how life first began.

Evidence will be reviewed that supports the fact of a worldwide flood that is found all over the Earth as opposed to the evolutionary idea of “Uniformitarianism” (everything is going along just like it always has). An idea the scriptures warned us about in II Peter: 3-7 *First of all, you must understand that in the last days scoffers will come, scoffing and following their own evil desires. They will say, "Where is this 'coming' he promised? Ever since our fathers died, everything goes on as it has since the beginning of creation." But they deliberately forget that long ago by God's word the heavens existed and the earth was formed out of water and by water. By these waters also the world of that time was deluged and destroyed. By the same word the present heavens and earth are reserved for fire, being kept for the day of judgment and destruction of ungodly men.*

What does science have to say about how old the Earth is? Is there scientific evidence for the belief of man evolving from ape-like creatures? What is the scientific value of evolution? What are the consequences to society if Evolution is taught?

In an age where the majority of our youth are leaving the church because “science” tells them that the Bible is not relevant anymore, it is urgent that they learn what science really does say. They will learn that true science not only supports what scriptures have to say, but also the scriptures show the only way real science can work. All major scientific discoveries were made by men who believed in the Word of God.
